Date of Birth: Sept. 10, 1997

### Objective

---

To collect the new experiences.

### Work Experience

---

March, 2023 - Now

#### Quality Assurance Engineer

RetailCare Pvt Ltd  
Kathmandu

- - Conduct comprehensive software testing to identify and report bugs or issues, ensuring the software functions correctly.
- - Develop detailed test plans and create test cases, serving as a roadmap for effective testing.
- - Collaborate closely with the development team to communicate and document issues, ensuring prompt resolution.
- - Perform regression testing to ensure that new software changes do not impact previously working features.
- - Evaluate software performance under various conditions to guarantee optimal speed and responsiveness.
- - Assess the user experience to identify and report usability issues, contributing to user-friendly design.
- - Contribute to continuous improvement efforts by working with the development team to enhance software quality and reliability.

I have hands-on experience with testing tools like Selenium for test automation, as well as proficiency in utilizing JIRA and Postman for conducting functionality tests, managing test cases, and tracking defects. Also having a good understanding of OOP concept and practices.

April, 2021 - December, 2021

#### System Support

ARK Trading  
Tilottama Rupandhi

I have worked as an ISP in the role of customer support(Par-time) in a Level 1 position. In this job, my role was to deal with customers' issues, troubleshoot and try to resolve issues from a remote location and assigned tickets for the field team if it wasn't possible to be resolved them remotely.

October, 2020 - October, 2021

#### System Administrator

Institute of Management Studies  
Thapathali Kathmandu

I worked as a system administrator at the Institute of Management Studies college. I was responsible for maintaining the intranet and internet, keeping official websites up to date, handling the servers issues, and correcting other technical issues. Furthermore, I was responsible to maintain the servers and associated devices connected to a network.
