

Miles S. Peterson

Swansea, IL • (618) 972-4486 • milespeterson730@gmail.com

Professional Summary

Software engineer with 10+ years of experience developing enterprise and defense-sector applications across full-stack, backend, and cloud-focused environments. Experienced in Java, C#, TypeScript/React, Spring Boot, Docker, Kubernetes, and AWS/OpenShift platforms. Strong background in modernization efforts, API development, containerized deployment, automated testing, and migration of legacy systems to scalable cloud-based architectures.

Technical Skills

Languages: Java, C#, JavaScript/TypeScript, Python, SQL, HTML/CSS

Frontend: React, Angular, Blazor, SASS

Backend: Spring Boot, Node.js, REST/SOAP APIs, Java EE

Cloud & DevOps: Docker, Kubernetes, AWS, OpenShift, Jenkins, Git

Databases: OracleDB, MySQL, MongoDB, Elasticsearch

Testing & Monitoring: Cypress, Selenium, Splunk, SOAPUI, Postman

Tools: IntelliJ, Visual Studio, VS Code, Maven, Bash

Operating Systems: Windows, Linux, macOS

Professional Experience

Tapestry Solutions — Full Stack Developer

Maryland Heights, MO | Oct 2024 – Jul 2025

- Developed full-stack services supporting Department of Defense weapon systems and mission-planning applications.
- Contributed to Next Generation Open Mission Planning Services (NGOMPS), including LRASM-related functionality.
- Built and maintained applications using TypeScript/React.js, C#, and shell scripting.
- Supported CI/CD workflows and deployment analysis using Jenkins and Bitbucket-based repositories.

General Dynamics Information Technology — Software Engineer

St. Louis, MO | Sep 2023 – Jan 2024

- Developed and maintained backend data-consumption services using Java, Python, and TypeScript for the National Geospatial-Intelligence Agency.
- Assisted OpenShift migration efforts through containerization and deployment pipeline improvements.
- Performed vulnerability remediation using Fortify and improved Elasticsearch logging/query performance.
- Worked extensively with Docker, AWS, and Red Hat OpenShift environments.

Lifecycle Engineering — Full Stack Engineer

Shiloh, IL | Feb 2022 – Aug 2023

- Developed enterprise applications for Air Mobility Command using C#, Blazor, and cloud-based infrastructure.
- Implemented end-to-end automated testing solutions using Cypress.
- Supported infrastructure migration efforts involving database platforms and deployment pipelines.
- Integrated SOAP APIs for enterprise data ingestion and interoperability.

Cornerstone Staffing Solutions — Software Engineer

O'Fallon, IL | Apr 2021 – Oct 2021

- Developed Spring Boot web services for the Surface Deployment & Distribution Command (SDDC).
- Maintained Oracle database integrations and resolved configuration issues within Red Hat Linux environments.
- Collaborated with military and civilian stakeholders to support enterprise logistics applications.

Competitive Range Solutions — Software Engineer / DevOps

O'Fallon, IL | Aug 2020 – Apr 2021

- Maintained and updated AWS-hosted enterprise applications across multiple environments.

- Developed ASP.NET and C# full-stack solutions using Visual Studio.
- Improved browser compatibility by modernizing legacy Internet Explorer functionality.
- Produced GitLab integration documentation and workflow guidance for development teams.

NextGen Federal Systems — Senior Systems Engineer

Remote | Feb 2020 – Aug 2020

- Enhanced decision-support applications for Air Mobility Command using Java and enterprise web services.
- Developed and improved SOAP and REST APIs supporting mission-critical logistics systems.
- Built centralized logging and monitoring pipelines using Elasticsearch.
- Reduced technical debt through improved unit testing and deployment scripting.

MarathonTS — Software Engineer

Remote | Sep 2019 – Jan 2020

- Modernized legacy Perl and Bash scripts into scalable Python, Java, and Nest-based services.
- Developed containerized microservices using Spring Boot and Docker.
- Supported geospatial cloud synchronization pipelines for AWS and NGA data centers.

SAIC — Software Engineer

Remote | Aug 2018 – Aug 2019

- Migrated legacy recruitment applications from Struts to Spring MVC using Java SE 8.
- Assisted with enterprise testing initiatives, including functional testing and documentation.
- Collaborated with distributed development teams supporting U.S. Army Human Resources Command systems.

SuprTEK — Junior Software Developer

O'Fallon, IL | Feb 2015 – Jul 2018

- Developed enterprise applications and geospatial tools supporting U.S. Air Force Air Mobility Command operations.
- Built full-stack functionality using Java, Spring Boot, Angular.js, and REST services.

- Implemented Elasticsearch-based search functionality and automated testing workflows.
 - Worked closely with analysts, developers, and government stakeholders to support large-scale enterprise systems.
-

Education

Bachelor of Applied Science — Computer Information Systems

McKendree University | Lebanon, IL

Associate of Computer Information Systems

Southwestern Illinois College | Belleville, IL

Certifications

- CompTIA Security+ CE
- Java SE 8 Certified
- DoD Security Clearance (Details Available Upon Request)
