PERSONAL SUMMARY

Dynamic mechanical engineer with strong leadership, communication, and technical skills. Proven collaborator and effective communicator with a solid foundation in Material Science, Manufacturing Process, Aerodynamics, Avionics, Thermodynamics, Energy Resources, Fluid Machines and Mechanics, and Green Energy. Passionate about researching composite materials, green energy and eager to contribute and grow in my career.

EDUCATION

Bachelor of Mechanical Engineering, Tribhuvan University 2019-2024
Relevant Coursework: Thermodynamics, Aerodynamics, Avionics, Energy, Hydropower, Drawing, Fluid Mechanics and Machines, Manufacturing and Production Process. 70.22%
+2 Science, Banepa Nist School 2017 - 2019

SKILLS

Technical Skills	Solidworks, Auto CAD, ANSYS, Manufacturing process, Microsoft Office
Soft Skills	Team work, Leadership, Adaptability, Communication
Language	Nepali(Native), English(Fluent), Hindi(Intermediate)

EXPERIENCE

Green Energy Engineer August 2024 - Present
Green Energy and Infrastructure Company Pvt. Ltd. *Balaju, Nepal*

- Worked as a Consultant Engineer specializing in green energy solutions.
- Developed a microgrid system for hydrogen production.
- Managed procurement of various hydrogen production systems and components.
- Assisted in the preparation of tenders for various mechanical equipment.

Production, Utility and Maintenance Engineer April 2023 - May 2023
Varun Beverage (Nepal) Pvt. Ltd. *Pepsicola, Nepal*

- Assisted in monitoring and optimizing production line efficiency.
- Supported quality control processes by conducting product inspections and maintaining compliance with safety standards
- Collaborated with maintenance teams to reduce downtime, ensure machines operating at its optimal condition.

PROJECTS

Building a Bridge to The Hydrogen Economy: A Distributed Approach With Small-Scale Solar Steam Methane Reforming. Designed and modeled individual components using CAD software and assembled them into a comprehensive 3D plant layout for hydrogen production from methane; conducted economic feasibility analysis of the plant.

Manufacturing of Tiles from Plastic Waste: A Circular Economy of Plastic Waste. Developed eco-friendly tiles using waste LDPE (low density polyethylene) and studied various physical and mechanical properties.

A case study of Venture Waste to Energy Pvt. Ltd.: Harnessing of CNG from household waste
Gained in-depth knowledge of various waste-to-gas conversion processes and evaluated the economic feasibility of the corresponding plant.

CERETIFICATION

- **Pascal Synthesis Photocoagulator Field Service Training** Attended 5 days field service training organized by Iridex
- **Basic Robotics** Attended 7 days basic robotics workshop organized by Robotics Club, IOE Purwancal Campus
- **Adobe Photoshop** Attended 15 days basic photoshop workshop organized by Scholars Space
- **AutoCAD** Attended 7 days basic autoCAD workshop organized by Society of Mechanical Engineering, IOE Purwancal Campus
- **Solidworks** Attended 7 days solidworks workshop organized by Robotics Club, IOE Purwancal Campus

DECELERATION

I, Anish Thapa, hereby declare that the information contained herein is true and correct to the best of my knowledge and belief.
