SUMMARY

AWS SAA-certified cloud professional with hands-on experience in CI/CD, Serverless architectures, Infrastructure as Code (IaC), and cloud deployment. Strong foundation in networking, Auto Scaling, and DevOps practices. Passionate about infrastructure automation and secure system design.

SKILLS

Cloud & DevOps: AWS (EC2, S3, IAM, RDS, VPC, Lambda, SQS), Git, GitHub Actions, CI/CD, Docker

Security & Identity: MFA, SSO, TCP/IP, DNS, HTTPS, SSL/TLS

Development & APIs: Node.js, SQL, PHP, Python, REST APIs, Postman

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (SAA-C03) | Amazon Web Services | Dec 2025

MERN Stack Web Development | Broadway Infosys

EDUCATION

Bachelor of Computer Applications (BCA) — VS International College (TU), Kathmandu

Expected Graduation: 2026 | Current Semester: 8th

Relevant Coursework: Cloud Computing, Computer Networks, Operating Systems, Databases, Data Structures, OOP

PROJECTS

Serverless Image Compression (AWS Lambda + S3)

- Designed an event-driven serverless pipeline utilizing AWS Lambda and S3 to automate image compression upon upload.
- Compressed uploaded images automatically upon S3 trigger, resulting in smaller file sizes and reduced storage footprint.

Static Website Hosting (Amazon S3 + CloudFront)

- Deployed a highly available static website on Amazon S3, utilizing CloudFront CDN to ensure low-latency global content delivery.
- Engineered an automated CI/CD pipeline using GitHub Actions to streamline deployments and ensure zero-downtime updates.

Full-Stack MERN Applications

- Developed scalable full-stack apps (eCommerce, News Portal, Student Management) with RESTful APIs and authentication.
- Implemented a 3-tier architecture with responsive React frontend, Node.js/Express backend, and MongoDB database layer, with full CRUD operations and REST API integration.
